Dolphin Git 5.0-17822

2022-11-07

Dolphin Git 5.0-17822 is compiled. This is the trunk of Dolphin Project. Dolphin is the first Gamecube emulator able to run commercial games! Dolphin is a Gamecube, Wii and Triforce (the arcade machine based on the Gamecube) emulator which supports many extra features and abilities not present on the original consoles. It has a partial Wii support and plays most Gamecube games.

Dolphin Git Changelog:

* Merge pull request #11258 from AdmiralCurtiss/imgui-crash-v2
* VideoCommon: Hold ImGui lock while initializing and shutting down ImGui.
* RenderWidget: Fix random crash due to missing ImGui context
* Merge pull request #11225 from iwubcode/graphics-mod-textureload-callable
* VideoCommon: call texture load graphics mod hook when Dolphin loads a texture
* Merge pull request #11246 from tellowkrinkle/PVDMemset
* VideoCommon: Zero PortableVertexDeclarations on initialization
* Merge pull request #11250 from AdmiralCurtiss/memory-widget-menu
* MemoryWidget: Split Actions into Import and Export.
